

Patriot®

Complete Solution Everything Included

Patriot® Steel Cutting Edge System

Why Choose the Complete System

- › **Save Money** - Save up to 20% on components when purchased as a system
- › **Single Part Number** - Simplified ordering and inventory tracking
- › **Everything Included** - No separate ordering of guards, hardware, or blades
- › **Easier Installation** - All components matched and ready to install
- › **Grade 8 Hardware Included** - Professional-grade bolts and washers
- › **Proven Performance** - Complete system engineered to work together

- 2 Integrated cast steel wear shoes filled with Winter Carbide™, welded to the back of the blade
- 3 Wear Indicators
- 4 3 – 4 ft Blade Segments
- 5 Interlocking Tabs

BLADE BACK

Winter Carbide™ filled cast steel wear shoe welded-on to increase wear life

Patriot® Steel Blade

Aggressive steel blade for rough road conditions

Patriot® is an aggressive, durable, and long-lasting steel blade engineered for municipalities who need reliable performance on rough or damaged roads. This hardened boron steel blade features serrations that cut through hard-packed snow and ice while withstanding road obstacles that could damage expensive carbide alternatives.

"The Patriot® system is a lifesaver, a night and day difference from other cutting edges. Your edges last over a year compared to others that may only last a storm, a week, or at most a few months."

Chris Webber, City of Rocky River, Ohio

Built for Durability & Performance:

- > **Serrated Cutting Edge** - Cuts through ice and hard-packed snow
- > **Integrated Carbide Wear Shoes** - Cast steel wear shoes filled with Winter Carbide™ welded to the blade back for extended life
- > **Wear Indicators** - Prevent moldboard damage and show high-wear areas
- > **3-4 ft Blade Segments** - Safer installation with interlocking tabs for strength

OPTIMAL BLADE ANGLE
