

Razor®

Complete Solution Everything Included

Razor® Carbide Cutting Edge System

Why Choose the Complete System

- **Save Time** - Perfect carbide & cover alignment right out of the box
- **Save Money** - Lasts **2x** longer than standard carbide & cover blades
- **Single Part Number** - Simplified ordering and inventory tracking
- **Everything Included** - Three blade sections, two PlowGuards, and Grade 8 hardware
- **Reduced Bolt Failures** - Welded construction prevents debris buildup between blades
- **Even Wear Across the Plow** - PlowGuards prevent washout and ensure uniform wear

PART NUMBER	DESCRIPTION	SIZE
SYS-RZ10F	Razor® w/ 2 PlowGuard Straight	10'
SYS-RZ10FP	Razor® w/ 2 PlowGuard CurbCast	10'
SYS-RZ11F	Razor® w/ 2 PlowGuard Straight	11'
SYS-RZ11FP	Razor® w/ 2 PlowGuard CurbCast	11'
SYS-RZ12F	Razor® w/ 2 PlowGuard Straight	12'
SYS-RZ12FP	Razor® w/ 2 PlowGuard CurbCast	12'

Razor® Carbide & Cover Blade

Perfect carbide & cover setup for superior road clearing

Razor® is a tough, ready-to-use blade that helps municipalities clear hard-packed snow and ice. This all-in-one system comes with carbide inserts and a steel cover blade already welded together in the perfect position. This stops debris from getting stuck between blades and prevents bolt failures that often happen with standard setups.

"1 part number is amazing as is the product. We have been using Winter blade kits and curb guards for years. They wear extremely well. The all in one kits are great. 1 part order and the trucks are ready to go!"

Raymond DeBruijn, Highway Maintenance Supervisor, Wisconsin

Built for Performance & Protection:

- > **25° 5/8" Trapezoid Carbide Inserts** - Matched to the most efficient plowing angle for superior cutting
- > **Integrated AR500 Steel Cover Blade** - Perfectly positioned to protect carbide from washout and impact
- > **Wear Indicators** - Show when carbide is used up, helping you prevent moldboard damage
- > **3-4 ft Blade Segments** - Safer installation with interlocking tabs for enhanced rigidity
