Razor® Arrow Carbide Cutting Edge System

Why Choose the Complete System

- **Save Money** - Lasts up to **10x** longer than OEM hardened steel blades
- **End-to-End Protection** - PlowGuard Jr. guards, with Winter Carbide™, prevent curb damage
- **Easier Installation** - Segmented design requires only one person versus two for OEM blades
- **Maximize Uptime** - Stay on the road making money instead of in the shop replacing edges
- **Complete Solution** - Two interlocking Razor® blade sections, two PlowGuard Jr. guards, and Grade 8 hardware

Razor® Arrow Carbide Blade

Premium protection for straight plow blades

Razor® Arrow is a professional-grade blade system engineered specifically for contractors with Western® PRO-PLUS® and SnowEX straight plows who need maximum durability and performance. This advanced system combines our DOT-proven Razor® carbide cutting edge technology with PlowGuard Jr. Curb Guards, creating a solution designed to outlast the plows it's installed on while preventing premature and uneven wear.

Built for Superior Performance:

- > **Razor® Carbide Insert Blade** - All-In-One carbide & cover blade with 5/8" carbide inserts & AR500 cover blade
- > **Welded-On AR500 Steel Cover** - 5/8" abrasion-resistant cover plate shields carbide from impact damage
- > **Premium Carbide Inserts** - Advanced induction brazing process fuses tungsten carbide to steel for exceptional wear resistance
