

Pegasus®

Complete Solution Everything Included

Pegasus® Carbide Expandable Plow Cutting Edge System

Why Choose the Complete System

- › **Save Money** - Lasts up to **10x** longer than factory hardened steel blade
- › **Easier Maintenance** - Adapter plate eliminates hard-to-reach factory bolts
- › **Reduce Downtime** - Replace blades with plow in resting position, no hydraulics needed
- › **Superior Protection** - Welded-on AR500 cover plate shields carbide from impact damage
- › **Maximize Uptime** - Stay on the road making money instead of in the shop

SYS-PEGASUSCB	Pegasus® Complete Carbide System	8'-10'

- 1 25° 5/8" Trapezoid Carbide Insert
- 2 Integrated AR500 Steel Cover Blade
- 3 Carbide Wear Indicators
- 4 Moldboard Damage Wear Indicators
- 5 3 – 4 ft Blade Segments
- 6 Interlocking Tabs

CARBIDE INSERTS

Trapezoid carbide insert with 25° bottom edge

Pegasus® Carbide & Cover Blade

Perfect carbide & cover setup for superior road clearing

Razor® is a tough, ready-to-use blade that helps municipalities clear hard-packed snow and ice. This all-in-one system comes with carbide inserts and a steel cover blade already welded together in the perfect position. This stops debris from getting stuck between blades and prevents bolt failures that often happen with standard setups.

Built for Maximum Performance:

- **Razor® Carbide Insert Blade** - Interlocking sections with 5/8" carbide inserts
- **Premium Carbide Inserts** - Advanced induction brazing process fuses tungsten carbide to steel for superior wear resistance
- **WinterFLEX® Rubber Wings** - Three-layer design with woven fabric interior, fully reversible for double the wear life
- **High-Strength Hardware** - Grade 8 bolts and Stover lock nuts prevent loosening during operation
